

Pagare Tejas Kiran

Chennai, India

☎ +91 7558388619 | ✉ tejaspagre1625@gmail.com | 🌐 tejas1625.me | [GitHub](#) | [LinkedIn](#)

Professional Summary

Passionate **Software Engineer** with experience building **web applications** and **AI-powered products**. Enjoy solving real-world problems, creating tools that help people, and continuously learning new technologies.

Education

Indian Institute of Information Technology (IIIT), Sri City

B.Tech in Computer Science and Technology

CGPA: **8.94/10**

Sri City, India

Expected May 2027

Work Experience

Soundverse AI | [Certificate](#)

Full Stack Engineer Intern

Remote

Aug 2025 – Nov 2025

- Enhanced the **frontend** and user experience of the Soundverse DNA service, serving , while resolving **5+ production bugs** to improve platform stability and usability.
- Implemented **event-tracking workflows** to capture user interactions and monitor analytics across the DNA section, enabling **data-driven** product decisions and improving feature adoption analysis .
- Engineered the **Dreampack asynchronous generation pipeline** with **Celery**, and **PostgreSQL**, scheduling daily personalized music generation for **1K+ users** and handling task retries, generation failures, track persistence, and delivery notifications.
- Debugged and fixed the **backend audio generation pipeline**, resolving failures in generation workflows and restoring reliable audio generation and delivery.
- Built the **Train DNA frontend** for the **Artist page**, enabling artists to train and customize their DNA profiles through an intuitive user interface integrated with the backend workflow.

Projects

HireHeaven | *Node.js, PostgreSQL, Redis, React, Groq, PgVector*

[GitHub](#)

- Built a production-ready recruitment platform featuring recruiter and candidate workflows, **AI-powered resume analysis**, secure authentication, and premium subscriptions.
- Engineered a **RAG-based** recruiter copilot using **PgVector**, **hybrid retrieval** (semantic + keyword search), and **LLM inference**, improving candidate retrieval accuracy by **30%** over traditional keyword-only search while enabling conversational resume exploration.
- Architected a **real-time AI conversational interviewer** using **Socket.IO**, browser-native **STT/TTS**, and **Groq Llama**, enabling bidirectional voice interviews and automated LLM-based evaluation with structured scores, strengths, weaknesses, and feedback persisted in PostgreSQL.

SwiftMart | *Node.js, MongoDB, Redis, React, CI/CD, Docker*

[GitHub](#)

- Architected a **scalable circular-fashion marketplace** supporting new and pre-owned apparel through a dual-sided marketplace.
- Optimized backend performance using **Redis caching**, **MongoDB indexing**, and **pagination**, reducing API response latency by **40%** while improving throughput under workloads.
- Dockerized the backend and implemented a **CI/CD pipeline** to automate application builds, Docker image creation, and deployment.

EchoSync | *React, Node.js, Express, TypeScript, MongoDB, Socket.io, Passport.js*

[GitHub](#)

- Developed a low-latency real-time messaging platform using **Socket.IO** over **WebSockets**, reducing message delivery latency by compared to HTTP polling.
- Secured REST endpoints and WebSocket connection handshakes utilizing **Passport.js** and **JWTs** via **HttpOnly cookies**, establishing strict participant-level authorization to prevent unauthorized room joins.

Technical Skills

Languages: Java, C++, Python, JavaScript, Linux

Frontend: React, Next.js, HTML, CSS, Tailwind CSS

Backend & Databases: Node.js, Express.js, FastAPI, REST APIs, WebSockets, JWT, PostgreSQL, MongoDB, Redis, PgVector

Gen AI: LLMs, RAG, LangChain, LangGraph, Vector Databases, Prompt Engineering

Cloud & Tools: AWS (EC2, SES), Docker, Git, GitHub, CI/CD

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Achievements & Leadership

- LeetCode:** 1650+ contest rating; solved 650+ DSA problems | [Profile](#)
- Runner-up, Agentica Hackathon (Abhisarga '25):** Backend Developer for an **Agentic AI** system.
- Teaching Assistant — Web Development:** Assisted in the Web Development course, supporting students with web development concepts, debugging, and project implementation.
- Core Member — IOTA Web Development:** Contributed to web development projects and technical initiatives within the organization.
